SPRING SESSION ENROLMENT UP

*The following report was received from
S.C.T. Clarke, Director, Special Sessions.*

Every year more students attend Spring Session. This year, enrolment was 3,078 compared with 2,676 last year and 2,081 the year before. The composition of the student body is also changing with Education dropping to 41 percent of the total. Arts now provides 15 percent of the students and Business Administration and Commerce provides 10 percent. Most students (85 percent) attended the preceding winter session, and the majority (65 percent) was also registered for summer session.

Spring Session 1975 provided 182 different courses (114 sections of full course equivalents) with 7 percent of them graduate level (numbered 500 or higher). Each Spring Session provides more varied offerings. Included this year were courses in Dentistry, Engineering, Health Services Administration, Nursing, and Rehabilitation Medicine. There were 168 instructors.

A survey of instructor opinion about Spring Session showed that about 30 percent considered the quality of student learning to be good in comparison with winter session, while almost as many deplored the rapid pace and superficial treatment caused by compressing courses into three weeks. They suggested as remedies a minimum four week term, restricted student load, and flexibility in mode of instruction.

A survey of student opinion focused on advantages and disadvantages of taking courses in Spring Session. The advantages mentioned most frequently were the possibility of concentrating on one or a very few courses, and of speeding up their program. Two closely allied disadvantages listed were compression with consequent problems of assimilation, and inability to complete reading and assignments.
